## **DETAILED ACTION**

### ***Drawings***

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the “implement frame structure” and “cylinder mounting structure” and the “implement” (claims 1, 11, 18), “roller structure” (claim 3), and “wheel frame” (claims 18,20) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled “Replacement Sheet” in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Specification***

2. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required:

There is no antecedent basis in the specification for the term “cylinder mounting structure” (claim 1), “roller structure” (claim 3), “wheel frame” (claims 18, 20).

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 2 and 7 line 2 “the frame” lacks positive antecedent basis.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. The claims include the use of the word “for” and “to” which indicates intended use. A claim containing a “recitation with respect to the manner in which a claimed apparatus is

intended to be employed does not differentiate the claimed apparatus from a prior art apparatus” if the prior art apparatus teaches all the structural limitations of the claim. Ex parte Masham, 2 USPQ2d 1647 (Bd. Pat. App. & Inter. 1987).

If Applicant(s) desire to give the phrase patentable weight, the Examiner respectfully recommends Applicant(s) remove “for” from the phrase where intended use is not desired.

7. Claims 1-2, 4-7, 10-12, 14, 16-20 (as understood) are rejected under 35 U.S.C. 102(b) as being anticipated by Ima.

Ima discloses a steering device comprising:

a cylinder 8 having a movable first rod 9;

implement frame structure 21 including cylinder mounting structure supporting the cylinder from the implement in a location wherein the cylinder will contact the material as the implement moves over the material;

a shield 13 connected to the first rod for movement;

wherein the cylinder comprises a steering cylinder connected to steerable wheels 25, and the shield moves with the rod;

wherein the steering cylinder is supported rearwardly of the shield;

wherein the steering cylinder also includes a second rod opposite the first rod, and

wherein the shield is connected between the first and second rods;

further including a shield support 40, 40' fixed to the frame, with low friction guide structure, and wherein the shield is carried on the shield support.

***Allowable Subject Matter***

8. Claims 3 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

9. Claims 8-9, 13, and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

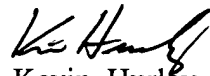

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references disclose protective structures for steering assemblies.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin Hurley whose telephone number is 703-308-0233. The examiner can normally be reached on Monday-Friday 9:30-5:00.
